## SUMMARY

Creative and adaptable software engineer with full-stack development experience and a strong interest in automation, systems, and infrastructure. Passionate about creating efficient, scalable solutions and supporting engineering teams with scripting, system maintenance, and troubleshooting. Familiar with Agile methodologies, API integration, and Linux/Windows systems. Eager to grow in a role that combines software development with platform and network support.

## WORK EXPERIENCE

### Software Engineer - Resilient Coders | Philadelphia, PA | Jan 2025 - Present

- Built modern, full-stack web applications using JavaScript, Node.js, and MongoDB in an Agile/SCRUM team environment
- Collaborated on application design, development, testing, and deployment across the software development life cycle
- Participated in code reviews and documentation to support scalability and maintainability
- Worked with RESTful APIs and implemented best practices in debugging and version control

### Freelance Full-Stack Developer | Philadelphia, PA | Feb 2025 - Present

- Developed custom solutions for small businesses, including automation scripts, dashboards, and internal tools
- Interacted with third-party APIs to integrate business data and improve functionality
- Delivered technical documentation and guided clients through maintenance and deployment

### FedEx - Delivery Driver | Essington, PA | Dec 2022 - Dec 2024

- Developed strong organizational and communication skills in a fast-paced logistics environment
- Worked closely with dispatch and internal systems-offering valuable insights into FedEx operations
- Maintained high efficiency while adapting to real-time changes in delivery routes and customer needs

### Amazon - Delivery Associate | Philadelphia, PA | Jun 2022 - Nov 2022

- Applied creative problem-solving to navigate technical and logistical challenges
- Developed time management and route optimization strategies to increase delivery efficiency

## SKILLS

- Languages/Tools: JavaScript, Node.js, MongoDB, HTML, CSS
- Systems & Tools: Git, REST APIs, Linux/Windows CLI, Agile, SCRUM
- Concepts: Networking basics (TCP/IP), scripting, software documentation, debugging

- Soft Skills: Troubleshooting, collaboration, adaptability, client communication
